ONE WEEK ONE LAB

DAY 3 – 16th August, 2023

The fifth day of celebration of One Week One Lab Programme was inaugurated by the then **Chief Guest Dr. Rakesh Tuli**, *Former Director, CSIR-NBRI, Lucknow & DBT-NABI, Mohali* and **Guests of Honour Dr. Arvind Kumar**, *Deputy Director General, Research, ICRISAT, Hyderabad*, adding more values to the event with their presence.

The **Chief Guest** and all **Guests of Honour** inaugurated the exhibition stall and interacted with the scientists and research Scholars.

HIGHLIGHTS

NBRI EIACP team interacted with the Chief Guest and Guests of Honour while also discussing our vision & goals of the EIACP Centre and sharing the key points to contribute towards a sustainable approach under **Mission LiFE initiatives**.

NBRI EIACP team distributed the newsletters and knowledge products to all the visitors and research scholars, while they also interacted with students to sensitize them about the **Green Planner App** and its use, in their study and daily life. A total of **41 visitors and research scholars**, along with students from different schools, visited our stall.

Environmental Information, Awareness, Capacity Building & Livelihood Programme Centre (EIACP)
of MoEF&CC, Govt. of INDIA
CSIR- National Botanical Research Institute, Lucknow

EIACP PC Network
NBRI-EIACP-PC-RP

The Environmental Information, Awareness, Capacity Building & Livelihood Programme Centre (EIACP-PC) at CSIR- National Botanical Research Institute, Lucknow is working on the theme of "Plants and Pollution" as Resource Partner to MoEF&CC, Govt. of India. The NBRI-EIACP-PC-RP has started functioning as a center in January 2005. It systematically collects, compiles and disseminates scientific data on diverse aspects of "Plants and Pollution" to several research organizations, town planners, policymakers, teachers, students and other stakeholders. EIACP of MoEF&CC is having 60 Programme Centers, which include 34 Thematic Centers as PC-RPs, and 26 State/UT Centers as PC-Hubs across the country. Activities of the NBRI-EIACP-PC-RP cover developing and publishing knowledge products, conduct outreach activities, carry out Mission LiFE related activities, capacity building programmes, develop and implement Green Skill Development Programme.

The "Green Planner" is a mobile app to provide information on different plants for mitigation of pollution. They are used to identify the plants, and to make decisions on the basis of their health. It will help in decision making about the plants to be used in different areas of public spaces, industrial zones, urban areas, etc. The app also provides information on the plants that are used in different areas of public spaces, industrial zones, urban areas, etc. The app also provides information on the plants that are used in different areas of public spaces, industrial zones, urban areas, etc.
