Talk on 'Save Water', A component of Mission LiFE on Aakashwani Lucknow 9th Oct 2023

'**Save water**', one of the crucial components of '**Mission LiFE**' was discussed by Dr N Manika, Programme Officer, NBRI- EIACP in a radio talk on 09.10.2023 which shed light on the critical issue of **water conservation** and offered practical solutions for a more sustainable future.

Dr. Manika began by setting the stage, explaining the significance of water in our lives and the growing **global concern regarding water scarcity**. She emphasized that everyone has a role to play in conserving this precious resource and the **important role of educational and research institutes** to play a bigger role in conservation of water.

The main component of the talk was the comprehensive overview of **effective water conservation strategies** by these institutes. She discussed **rainwater harvesting, water-efficient technologies, sustainable gardening practices**, and simple yet impactful everyday **habits** that students and employees of these organisations can adopt.

The radio talks on water conservation served as a pivotal educational and motivational tool. It not only raised **awareness** about the critical issue of water scarcity but also **inspired action** among the listeners.
